SKILLS

Languages (JavaScript, TypeScript, Python) | Front-end (NextJs, ReactJs, Angular) |
Back-end (NodeJs, ExpressJs, NestJs, Django, Fast API, Frappe) | Database (MySQL, MongoDB, PostgreSQL) |
AWS console (Deployment, CI/CD) | ORM (Prisma, Sequelize, ObjectionJs) | Langchain | AI Integration | Docker

CERTIFICATES

Angular 🔗 — From HackerRank | NodeJs 🔗 — From HackerRank | MySQL 🔗 — From HackerRank

WORK EXPERIENCE

- Full-Stack Developer**, *Techuz Infoweb PVT. LTD.* 🔗 01/2022
Full Stack Developer crafting intuitive, high-performance web apps using React.js, Next.js, Node.js, TypeScript, and MySQL— focused on seamless UX and business impact. Ahmedabad, India
- Sr. Full Stack Developer**, *Saasjoy Solutions Private Limited* 03/11/2025
Leading the development of scalable enterprise solutions using **Frappe/ERPNext** and modern web technologies. Passionate about **system architecture, DevOps, CI/CD, deployment automation, technical mentoring**, code quality, and building reliable products that create measurable business value. Ahmedabad, India

PROJECTS

- Tutorac - Ed-Tech Platform** 🔗
Tutorac is an online learning platform for classes 11 & 12, offering 4K video lessons with 3D visuals, live exam prep tests, integrated quizzes, and a student-teacher doubt clarification module. Built from scratch to enhance learning through an immersive experience.
Technology stack: NodeJs, Angular, Mongodb, MySQL | **My role:** Full Stack Developer
- Getlitt - Kids' Gamified Reading Platform** 🔗
GetLitt! is a gamified e-learning platform designed to build reading habits in children through an engaging digital library and interactive challenges. It features books across diverse genres, organizes global reading olympiads, and partners with schools—recently earning a spot in a startup accelerator program.
Technology stack: NodeJs, Angular, Mysql, PostgreSQL | **My role:** Full Stack Developer
- PartsPractice - AI Medical Training** 🔗
The Oxford Mtrain Web App is an AI-powered training platform for medical therapists, offering realistic patient simulations, role-playing exercises, progress tracking, and AI-generated feedback. With secure access and personalized subscriptions, it delivers an immersive learning experience to enhance therapist skills and patient care.
Technology stack: NodeJs, ReactJs, Mysql
AI tools: ChatGPT (models: gpt-3.5-turbo, gpt-4o and tts-1) | **My role:** Full Stack Developer
- DivorceX - AI Divorce Support**
DivorceX is an AI-driven web app that uses ChatGPT APIs to provide contextual support for divorce-related scenarios. Users can input messages, documents, or audio to receive personalized responses. Features include interaction history, AI assistance, and a subscription-based model for advanced access.
Technology stack: NodeJs, ReactJs, Mysql
AI tools: ChatGPT (models: gpt-4o) | **My role:** Full Stack Developer
- Insyd - AEC industry** 🔗
A discovery and engagement platform for the professionals of the AEC industries.
My Role: Led this project and worked on database design. Reviewing PRs and deployment on AWS.

Aloha-Bids – Car Auction Platform

Web-based portal for listing, bidding, and purchasing automobiles with role-based access for buyers, sellers, and admins. Focused on seamless UX, security, and performance.
My Role: My role: Led this project and implemented bidding logic with Stripe. Reviewing PRs and deployment on AWS.

Harrier Chat bot - RAG App

Augmented Generation (RAG) application using LangChain to provide intelligent, conversational support for Harrier car users. The system analyzes user queries to identify potential car issues and delivers accurate, context-aware responses by retrieving relevant documentation and technical knowledge—reducing the need for immediate visits to mechanics or service centers.

Eezily - Real Estate

Developed a comprehensive real estate platform using **Frappe Framework** and **React.js** that streamlines property management and customer interactions. The platform enables organizations to manage residential and commercial projects, properties, floor plans, amenities, pricing, and project highlights. It also includes broker and associate management, while allowing end users to browse, buy, sell, or rent properties through a seamless, responsive interface. Contributed to both frontend and backend development, REST API integration, authentication, and overall system architecture.
Tech Stack: Frappe Framework, React.js, Python, JavaScript, MariaDB, REST APIs
My Role: Developed end-to-end features across the React frontend and Frappe backend, built REST APIs, managed CI/CD and deployments, and provided technical guidance.

EDUCATION

Bachelor of Technology (Electronics & Communication), *Jodhpur institute of Technology* 08/2018 – 05/2022
Rajasthan, India

AWARDS

Emerging Employee of the Month, *Techuz Infoweb PVT. LTD* 23/11/2022
Techuz Infoweb Pvt. Ltd. gave me the emerging employee of the month award for outstanding performance and consistent growth.
